PulseIQ | Executive Company-Health Scorecard

Task 15 | Executive KPI overview

KPI values are sourced from governed metric views.

Executive KPI Scorecard

Select reporting month

September 2026

Selected month: September 2026 | Trend comparison: August 2026

Headcount

Selected-month value

440

Target: Not configured for selected month

Trend: +14.00 vs previous period

Status: Informational

Attrition Rate

Selected-month value

0.34%

Target: 1.00%

Trend: -0.08 percentage points vs previous period

Status: On target

Payroll Cost

Selected-month value

₹55,014,383.87

Target: Not configured for selected month

Trend: +6,123,701.63 vs previous period

Status: Target not configured

Attendance Rate

Selected-month value

94.60%

Target: 94.00%

Trend: +1.43 percentage points vs previous period

Status: On target

Net Profit

Selected-month value

₹-14,985,979.13

Target: Not configured for selected month

Trend: +7,140,667.63 vs previous period

Status: Target not configured

Operating Margin

Selected-month value

18.67%

Target: Not configured for selected month

Trend: -8.49 percentage points vs previous period

Status: Target not configured

Overdue Receivables

Selected-month value

Unavailable

Target: Not configured for selected month

Trend: Unavailable — no governed value for 2026-08

Status: Unavailable

No value exists for the selected month in this governed view. No value from another month is substituted.

Task Completion Rate

Current governed value (not month-grained)

83.62%

Target: 80.00%

Trend: Unavailable — governed view has no reporting month

Status: On target

This KPI is a current aggregate from its governed view; the source does not expose a reporting-period column, so its value cannot be filtered by the month selector.

Traffic-light rules: Green = target met; Yellow = within 5% of target; Red = target missed. Context-only KPIs are informational. Targets are read from metric_kpi_targets for the selected month and are never invented. Trends compare the selected month with the immediately previous calendar month. KPIs whose governed views do not expose a reporting month are shown as current aggregates and are explicitly marked as not month-grained.
